

Brazilian feelings about elections (on twitter)

Ciência de dados - IMD0905
Professor Ivanovitch

Hello!
We are:

Hugo
Map plotting and
data cleaning

Paulo
Data collecting
and processing

Tyrone
Idealizer, research
and documenting

The great idea

What do we want to do?

Feeling analysis from twitter

- ◆ Get a lot of tweets in a context
- ◆ Analyze the content polarity
- ◆ Plot it on a map divided by states

How to do this?

Which tools/libs did we use?

Python Libraries

Tweepy

An easy-to-use Python library for accessing the Twitter API.

TextBlob

A Python library for processing textual data. It provides a simple API for into common natural language processing (NLP) tasks.

Folium

Folium makes it easy to visualize data that's been manipulated in Python on an interactive leaflet map.

Shapely

Shapely is a BSD-licensed Python package for manipulation and analysis of planar geometric objects

Challenges?

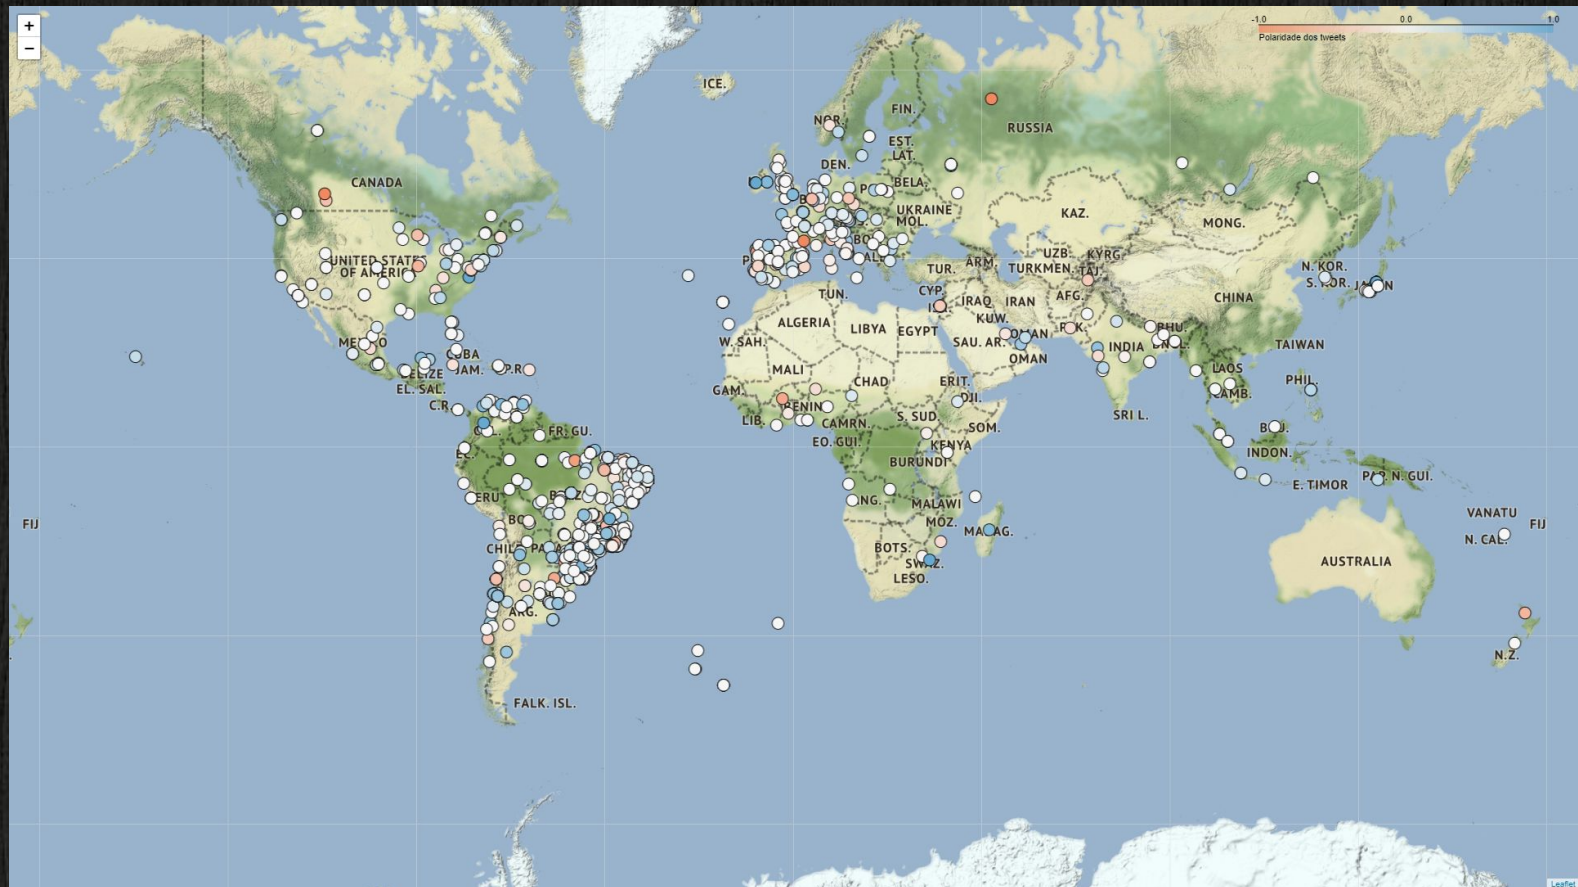

- ◆ Tweet doesn't provides a nice geolocation
- ◆ Google translate API rate limit
- ◆ Choose the search key
